PROFILE

I'm a Senior Mobile & AI Engineer in Karachi with 9+ years of experience. I'm currently at the **State Bank of Pakistan**, after **JS Bank** and **HLB**. I lead the central bank's official Flutter app, from the AskSBP AI chatbot to VAPT-hardened security. At JS Bank I built camera-based NADRA biometric verification for branches, and I run **Paxeess**, my own software studio that builds apps, websites and business platforms for clients.

HIGHLIGHTS

- Lead developer, **SBP Unified Mobile App** (Android & iOS): AI chatbot with voice, ATM locator, bilingual and accessible.
- Banking-grade security: VAPT remediation, TLS pinning, AES-256-GCM, root/jailbreak/Frida detection, App Check.
- **JS Bank Touchless Biometric**: camera-based NADRA fingerprint verification for branch staff, with no scanner needed.
- Web portals in **ASP.NET Core 8**, **React** and **Node.js**, including Sunwai (SBP), Therapy Home and Sareena PartHub.
- Applied AI in production: LLM chatbot, STT/TTS, ML Kit OCR, Wav2Lip/RVC on FastAPI + CUDA.

EDUCATION

BSc Computer Science, Federal Urdu University, Karachi (2014–2018)

Power BI Report Server Training, NIBAF Pakistan (May 2026)

Career

Senior Application Engineer — Mobile Mar 2026 – Present

State Bank of Pakistan

- Lead developer of the SBP Unified Mobile App (Flutter): economic indicators, AskSBP AI chatbot, ATM/branch locator, FCM, EN/Urdu.
- Led VAPT remediation and hardening: AES-256-GCM config, Keystore/Keychain, root/jailbreak/Frida detection, TLS pinning, App Check, R8.
- Maintain the Sunwai complaint app (live). Rebuilt it as an ASP.NET Core 8 MVC portal on REST + SOAP backends.
- Designed the SMElevate SME-loan portal architecture: Cloudflare, WAF, VPN, MFA, per-bank RBAC.
- Built an FCM notification server, an admin panel and a Python developer tool suite.

Senior Software Engineer — Android | Oct 2023 – Mar 2026

Flutter

JS Bank — Innovation & IT Center

- Built Touchless Biometric, a staff-only branch app that verifies customer fingerprints against NADRA using the phone camera.
- Built One Window, a staff-only in-branch account opening app with Verisys, biometrics, e-forms and signature capture.
- Flutter apps with GetX, Lottie and Firebase; JWT and social login; AI lip-sync and STT (Wav2Lip, RVC + VITS, FastAPI on CUDA).

Senior Software Application Developer Jun 2021 – Oct 2023

Habib Bank Limited — Innovation & IT Center

- Internal, staff-only Android apps (Kotlin/Java): People Connect On the GO (HR), Roshan Digital Account tablet onboarding, Bank Assets Survey, Branch Survey.

Senior Mobile Application Developer Mar 2020 – Jun 2021

Appxone

- Led Android projects, mentored juniors, owned unit testing and deployments.

Android Application Developer Nov 2018 – Mar 2020

Dusky Solutions

- Arabic (RTL) e-commerce and services apps for the Gulf market: Khuta Alkhair and Gatak Alfazaa. YouniForm school-uniform e-commerce app.

Android Developer · Cloud Chef Dec 2017 – Apr 2018

- Web-services management app on the Cloud Chef platform; trained other developers.

Android Developer · Comsol Pakistan Jun 2017 – Dec 2017

- Email client for phones and tablets with Dropbox, Gmail, OneDrive and Yahoo integration and offline mode.

Customer Support Executive · ibex Global Dec 2016 – Apr 2017

- Telenor campaign: requirement analysis of customer problems.

STATE BANK OF PAKISTAN

LAUNCHING SOON

State Bank of Pakistan — Unified App

Official SBP mobile app · Flutter (Android & iOS)

The official cross-platform app of Pakistan's central bank. It brings SBP's public services together in one bilingual (English / اردو) experience: live economic indicators, press releases and circulars, investment schemes, an ATM/branch locator and the AskSBP AI assistant. It is fully config-driven: content, URLs and feature flags come from an encrypted remote config, so they can change without a store release.

- Key Economic Indicators — Policy Rate, KIBOR, PKR-USD (daily with monthly fallback)
- AskSBP AI chatbot with voice input, text-to-speech and reasoning disclosure
- ATM & branch locator — GPS, 3 km bounding-box search, directions
- Press Releases, Circulars & Notifications feed with in-app PDF viewer

STATE BANK OF PAKISTAN

LIVE

SUNWAI — Customer Complaint Portal

SBP complaint management · Mobile app + ASP.NET web portal

State Bank of Pakistan's official consumer complaint system. Pakistani residents, overseas Pakistanis and foreigners use it to lodge and track complaints against banks, Roshan Digital Account (RDA) and RAAST. I maintain the cross-platform Flutter app (live on Google Play and the App Store).

- Three onboarding paths — CNIC, NICOP/POC and Passport — with OTP verification
- RDA, General Banking and RAAST complaint modules with guided questionnaires
- Cascading bank → city → branch pickers, attachment upload via token + SOAP
- Dashboard with Total / Open / Closed complaints and per-complaint detail

STATE BANK OF PAKISTAN

UNDER DEVELOPMENT

SMElevate — SME Loan Portal

Smart loan request management · Mobile + Web

A loan-request platform that links SMEs, commercial banks and the State Bank of Pakistan. Applicants apply through an iOS/Android app or the web portal, which share one API and workflow. Commercial banks review and approve applications over a secure VPN, and SBP administrators oversee the process from an internal, MFA-protected admin portal.

- Applicant mobile app + web portal on a single shared API and workflow
- Create → submit → bank review → approve / reject → status notifications
- Per-bank role-based access — each bank sees only its own applications
- Six-zone network design (Internet, DMZ, App, Integration, Data, SBP Internal)

PERSONAL / INTERNAL TOOLING

PRIVATE REPO

Paxees Developer Tool Suite

Python desktop toolkit — API, JSON, PDF, image & APK tools

A Windows desktop toolkit with 12 tools behind one launcher, built for day-to-day mobile and backend work. It includes a Postman-style API client, JSON/XML diff, inspection and formatting tools, a PDF editor and converters, image converters with background removal, and an APK/AAB signing inspector. Heavy work runs on background threads, and modules load lazily, so a missing optional library disables only the tool that needs it.

- Secure API Client — collections, history, environments ({{baseURL}}), cURL import/export
- JSON / XML Compare — ignore order, match by key, numeric tolerance, export JSON/CSV/TXT
- JSON Inspector — node/key stats, 4 duplicate detectors, schema view (180k nodes in ~0.7s)
- JSON Formatter — validate, auto-repair, JSONL/CSV, VS Code-style folding (47s → 2.3s fix)

JS BANK

STAFF ONLY

JS Bank Touchless Biometric

Camera-based NADRA fingerprint verification · JS Bank branch staff only

An internal app for JS Bank branch users. Staff verify a customer's identity against NADRA with the phone's own camera, so no separate fingerprint scanner is needed. The app guides the customer to hold up four fingers of the left or right hand (or a thumb).

- Contactless 4-finger capture of the left and right hand from the phone camera, with an on-screen hand-shape overlay
- Fingerprint quality scoring (NFIQ) before submission, so poor captures are retaken
- Conversion to WSQ images and fingerprint templates for NADRA biometric verification
- CNIC QR scanning and staff login, with results returned to the branch workflow

JS BANK

STAFF ONLY

JS Bank One Window — Account Opening

In-branch digital account opening · JS Bank staff only

One Window is JS Bank's in-branch onboarding app. Branch staff use it to open accounts and create customer records (CIF) on a tablet or phone, without paper forms. It verifies the customer with NADRA (Verisys and fingerprint biometrics, from a USB scanner or the phone camera), fills dynamic e-forms, captures documents and signatures, and submits the case for processing.

- Guided CIF / account-opening wizard: customer info, contact and next of kin, PEP and demographics, account details, summary
- NADRA Verisys and fingerprint biometric verification (Nitgen USB scanner, or contactless capture via Touchless Biometric)
- Customer signature capture and document / picture upload with on-device processing (OpenCV)
- Dynamic e-forms with reusable form components and searchable pick-lists

Therapy Home — Special Education School

School management for a special-needs school · Nagan Chowrangi, Karachi

Therapy Home is a special-education school and therapy centre at Nagan Chowrangi, Karachi. It serves children with autism spectrum disorder, Down syndrome, cerebral palsy, speech and language difficulties, learning challenges, slow learning, hearing or vision impairment, and physical or intellectual challenges. I built its school-management platform.

- Student admissions with an individual therapy / session plan per child
- Per-session billing — the same therapy can carry a different rate for each child, with live net-fee totals
- Sequential invoices and bilingual A4 / PDF fee slips with reprint
- Fee records: search, billed vs paid charts, outstanding dues

Sareena Parthub — Mobile Parts ERP & Marketplace

Multi-shop ERP · Web panel · Flutter app · Consumer marketplace

A multi-tenant ERP and marketplace for mobile-phone parts markets. A Super Admin manages markets and shops. Each shopkeeper runs inventory, point of sale, purchasing, supplier and customer ledgers and profit reports, and publishes products to a public storefront.

- Super Admin → markets → shops, with strict per-shop data isolation and role gating
- Brands, models, categories; one part mapped to many compatible handsets
- Central stock-movement service with weighted-average costing
- POS sales, purchase orders, estimates, returns, supplier & customer ledgers

Paxees: my software studio

Alongside my full-time role, I run **Paxees**, a small software studio with a five-person team (project management, Android/Node.js, front-end and graphics). We build mobile apps, websites and business platforms for startups, schools, retailers and SMEs, from discovery and fixed estimates through store release and long-term support.
